

HYBRID ENERGYPOD

HEP 17-1M-6Spv-86-I02-CB

- Market: Offshore/Onshore
- 100% Renewable Energy
- Single wind turbine (3kW PMG)
- Solar PV panels (6-10 X 300Wp panels)
- Yield (calibrated in the Southern North Sea area between 4 - 20m/s windspeed average):
 - » 220 - 3500 W (continuous load minimum)
 - » 2.5 - 30 MWh (annual power delivery)
 - » 4 - 60 kW (peak load, for 1 hour per 24 hour recharge cycle)

- Battery pack:
 - » 2 x 24 2V 900Ah, PowerSafe SBS EON
 - » Autonomous 12 days (no wind or system failures)
- Satellite controlled Energy Management System
- Output: any configuration
- Footprint: 17.5m²
- 6-12 month maintenance interval
- 2 year guarantee
- Life span: 10+ years
- Turnkey and full service option available
